Senthora

FACT SHEET
NOVEMBER 2026

# An AI language tutor you talk to out loud.

Senthora is a voice-first AI language tutor for iPhone and Android. Learners hold real spoken conversations with an AI tutor in Spanish, English, French, German, Italian or Portuguese. The tutor answers in a natural voice and corrects mistakes as the conversation goes. After each call, a summary shows the grammar fixes and new words, and a separate pronunciation practice flags the words to work on. Practice is built around 15 minutes of conversation a day.

| | |
|---|---|
| Product | Senthora, a voice-first AI language tutor app |
| Platforms | iPhone and iPad with iOS 15.1 or later (App Store), and Android 7.0 or later (Google Play) |
| Launched | May 2026 |
| Languages | Spanish, English, French, German, Italian, Portuguese. Russian is coming soon |
| Levels | Complete beginner, beginner, elementary, intermediate, advanced |
| Ways to practice | Live voice call or text chat with an AI tutor, plus role-play scenarios started from the home screen |
| Personalization | Native language and the language to practice, learning goal (such as travel, career or family), favorite topics, 4 tutor speaking styles (Friendly & Encouraging, Adaptive & Challenging, Professional & Structured, Casual & Fun) and 3 speaking speeds (normal, relaxed, slow). The tutor remembers what was practiced last time |
| After each call | A summary of the learner's own sentences, corrected, with the grammar rule behind each fix, and the new words from the conversation with audio |
| Pronunciation | The learner reads a short paragraph aloud; the app marks the exact words to work on, or shows ✓ Correct |
| Themes | Dark mode and light mode |
| Progress | Words learned, minutes practiced and days practiced, shown on the learner's profile |
| Privacy and safety | For ages 16 and over, checked once before the first voice call (the date of birth is not stored). Two separate voice permissions, both off by default. Audio is not stored and not used to train AI models. Learners can report any tutor reply from inside the conversation |
| Daily practice | 15 minutes of voice conversation and 10 minutes of pronunciation practice a day; extra minutes can be added |
| Price | 7-day free trial for new subscribers, then a monthly, multi-month or yearly subscription. Current prices are shown in the App Store and Google Play listings |
| Technology | Live audio by LiveKit, speech-to-text by AssemblyAI, the tutor's replies by an OpenAI model, the tutor's voice by ElevenLabs, and pronunciation assessment by Microsoft Azure Speech. The app and the privacy policy list the same companies |
| Company | Intersolution Trade OOD, Sofia, Bulgaria |
